INTRODUCTION

Grant Agreement Preparation Forms (GPF's) have been designed to facilitate the project negotiations and the production of the grant agreement. It is a main communication instruments between the co-ordinator representing the Consortium and the Commission's Project Officer. Essentially the forms are used to identify the beneficiaries that will sign/accede to the grant agreement, to determine the eligible costs and European Union contribution . The forms also include a standard declaration to be signed by each participating organisation.

To assist the filling in of the GPF's the following is made available:

- Annotations – these are attached to the standard forms and should be read carefully
- Pre-filled legal information (see below)
- NEF – NEF is an online tool to be used by the co-ordinator and the beneficiaries to edit the content of the GPF's

Legal information is held in the A2.1 form. This information is pre-filled by the Commission services using either information taken from the Commission database or from the proposal. Depending on the validity of this information, the organisation concerned may have to supply to the Commission with a so called "identification fiche" and supporting legal documents. For instructions on this, see the annotations to the A2.1 form.

The budget table (A3.1) is to be used in Part A of Annex I of the grant agreement.

Abstract ⁹ (max. 3000 char.)

Cities face a scenario characterized by shrinking budgets, increasing demands of services from their citizens and the need to reinvent themselves in their quest to become Smart Cities.

Simultaneously, the Internet brought new opportunities to orchestrate collaboration, fostering the creation of a large base of commons in code, user generated contents and even telecom infrastructures with the emergence of Bottom-up-Broadband networks. Cities have many times lacked the resources and mechanisms to take full advantage of this wealth.

However, organizations like Code for America are showing how they can effectively and successfully intermedate between citizens and cities and help in closing this gap.

Commons4EU aims to build on the shoulders of this experience with an initial core team of 7 cities: Amsterdam, Barcelona, Berlin, Helsinki, Manchester, Rome and UK-NESTA (UK cities involved in the project through NESTA) working together in 2 main areas:

1) Code Commons. Developing collaborative web projects following the methodology of Code for America based on principles rather than on sectors and by opening existing code in the participating cities and leveraging the European EPSI platform, following a certain model. They should:

- Be web/mobile applications.
- Enable cities to connect with their constituencies in ways that reduce administrative cost and engage citizens more effectively.
- Support the move toward transparency and collaboration.

-Be shareable, meaning that an application built for one city could be used by any other city.

2) Bottom-up-Broadband Commons. Exploring with users in real-life environments, three new technologies: Super Wifi, Sensor integration into wifi networks and fiber deployment as commons (both new techniques such as aerial as well as fiber bandwidth management)

The experience of the project will be capitalized giving birth to two pan European organizations: Code for Europe and BuB for Europe that will carry further on its endeavour.

SME means micro, small and medium sized enterprise within the meaning of Recommendation 2003/361/EC in the version of 6 May 2003 (see http://ec.europa.eu/enterprise/enterprise_policy/sme_definition/index_en.htm).

An enterprise is considered as an SME, taking into account its partner enterprises and/or linked enterprises (please see the above mentioned recommendation for an explanation of these notions and their impact on the definition), if it:

- employs fewer than 250 persons
- has an annual turnover not exceeding EUR 50 million, and/or
- an annual balance sheet total not exceeding EUR 43 million
- is autonomous

The headcount corresponds to the number of annual work units (AWU), i.e. the number of persons who worked full-time within the enterprise in question or on its behalf during the entire reference year under consideration. The work of persons who have not worked the full year, the work of those who have worked part-time, regardless of duration, and the work of seasonal workers are counted as fractions of AWU. The staff consists of:

- employees;
- persons working for the enterprise being subordinated to it and deemed to be employees under national law;
- owner-managers;
- is autonomous

partners engaging in a regular activity in the enterprise and benefiting from financial advantages from the enterprise.

ATTENTION: Apprentices or students engaged in vocational training with an apprenticeship or vocational training contract can not be included as staff. The duration of maternity or parental leaves is also not counted.

The data to apply to the financial amounts (e.g. turnover and balance sheet), as well as to the headcount of staff, are those relating to the latest approved accounting period and calculated on an annual basis. They are taken into account from the date of closure of the accounts. The amount selected for the turnover is calculated excluding value added tax (VAT) and other indirect taxes.

In the case of newly-established enterprises whose accounts have not yet been approved, the data to apply is to be derived from a bona fide estimate made in the course of the financial year. These organisations must insert "N/A" for the two questions relating to the duration and the closing date of their last approved accounting period.
